## Professional Summary

Backend Laravel Developer with hands-on experience building scalable backend systems and RESTful APIs using Laravel and MySQL. Strong background in authentication, authorization, performance optimization, and secure backend development. Experienced in real-world projects including e-commerce and job board platforms.

## Backend Experience

### **Backend Laravel Developer — Freelance / Personal Projects (2022 – Present)**

- Developed and maintained RESTful APIs using Laravel.
- Designed relational databases using MySQL and optimized complex queries.
- Implemented authentication, authorization, and role-based access control.
- Applied backend security best practices and OWASP awareness.
- Used Git & GitHub for version control and collaborative workflows.

## Projects

### **Wazifa – Job Board Platform (Laravel, MySQL)**

- Built scalable backend services and RESTful APIs.
- Implemented multi-role authentication and admin workflows.
- Secure resume uploads and data validation.

### **E-Commerce Platform (Laravel, MySQL)**

- Developed full backend for products, orders, and cart system.
- Implemented role-based access control and optimized queries.
